DEMOGRAPHY.

For a brief summary of the results for Tasmania of the Census of 1921 see Tasmanian Pocket Year Book; for fuller information see Tasmanian Statistics, 1921-22, and Census Bulletin, No. 17; for complete details see the Census Reports of the Commonwealth Bureau of Census and Statistics. A few preliminary results of the Census of 1933 are given herein.

For estimate of mean population of Municipalities in 1933 see page 19.

Reference may be made to the Commonwealth Annual Bulletin of Demography for fuller information for Tasmania in respect to:—

Ages, birthplaces, and occupations of parents of children born.
Birthplaces and occupations of persons who died.
Ages, birthplaces, occupations, and conjugal condition of persons who married.

Also for detailed information for the Commonwealth as a whole, but not for Tasmania separately, in respect to:—

Mother's age, showing duration of marriage and previous issue.
Interval between marriage and first birth.
Causes of death classified according to occupations.
Duration of marriage, total issue, and average family for persons who died.

THE MEASUREMENT OF POPULATION.

The population of Australia has been counted systematically every 10 years since 1881, but owing to financial stringency the census which ordinarily would have been taken in 1931 was not taken until 30th June, 1933, the results of which are now being prepared.

At the census, the numbering is carried down to the smallest divisions, and full information as to age, occupation, nationality, &c., is collected. Between censuses the only official counting is for whole States, and information as to age, &c., is necessarily incomplete. The inter-censal estimates are made by keeping count of the births and deaths in each State, and of arrivals and departures to and from each State. These estimates are made by the Commonwealth Statistician for the last day of every quarter.

There are, no doubt, errors in the census, but they may be taken as negligible. This is not the case with the inter-censal estimates. The counting of births and deaths is very accurate, but it has been found impossible to get an exact record of migration. Movement across land frontiers of States presents obvious difficulties in counting, but experience has also shown that the estimates of Tasmanian population are liable to substantial error. There is, in general, a considerable number of unrecorded departures, so that any State which is losing population by migration tends to have its population overestimated.

For any division smaller than States it is impossible to give any trustworthy estimate between censuses. Where growth has been, on a general impression, steady since 1921, a fair estimate may be made, based on past experience and the last quarterly estimate for the whole State. But war broke all continuity in the previous decade, and the later abnormal migration from Tasmania makes any such calculation of little value for any town, municipality, or other division of this State. Under these circumstances, the best source of information is the electoral roll, and the number of electors enrolled, combined with the quarterly estimates for the State, offers a basis for rough estimates of inter-censal populations of parts of this State. The figures for divisions and municipalities given herein are based on the census of 30th June, 1933.

STATISTICAL SUMMARY for TASMANIA, from 1836 to 1933 inclusive.

Launceston and Suburbs	15,204	17,637	32,841	86·2

(*a*) Including shipping population, 263 males and 4 females.
(*b*) Moonah, Derwent Park, and suburban to Humphreys' Rivulet.
(*c*) City boundary to Brown's River.
(*d*) Including Trevallyn, Invermay, and Mowbray. Newstead and Lawrence Vale have also been included in anticipation of the extension of the city boundaries on the 1st July, 1934.
(*e*) The Launceston Suburbs include Franklin Village, Youngtown, and St. Leonards which are in the St. Leonards Municipality, together with those portions of adjoining municipalities, St. Leonards, Evandale, Westbury, Lilydale, and Beaconsfield which are definitely suburban in character.

VITAL STATISTICS.

TASMANIA, 1933.

In the following tables births which have occurred in Tasmania since 1920 have been allocated to the districts where the parents were usually resident, and deaths have been referred to the districts which included the usual residence of the deceased. The district rates are consequently true measures of the matters presented, except in so far as a district contains a hospital or infirmary where the inmates are domiciled for extended periods. Prior to 1920 it was customary to record births, deaths, and marriages as pertaining to the district in which the event occurred. The district rates for these earlier years, however, have been adjusted as far as practicable so as to be reasonably comparable with the later results.

In the following review and throughout the tables of this publication, population and migration estimates, as also birth, death, and marriage rates, over the last intercensal period 1921 to 1933 have been revised in accordance with the results ascertained at the census of 30th June, 1933.

NOTE.—Figures in parentheses refer to the year 1932, except where otherwise indicated.

INCREASE OF POPULATION, 1933.

The estimated increase to the population of Tasmania during 1933 was 1502 (2143) persons, comprising 826 (893) males and 676 (1250) females. This was the lowest increase experienced since 1928, due mainly to losses from net migration in 1933 amounting to 859 (326) persons. Over the preceding four years, 1929-32, a distinct improvement had been apparent in net migration, with an average loss of only 67 persons annually. In two of those years, 1929 and 1931, actual gains of 338 and 461 persons respectively were recorded from this source. In contrast with this favourable experience the loss from net migration in 1933 was relatively very heavy. The excess of departures over arrivals in 1933, however, was still well below the heavy losses which were a feature of the years previous to 1929, as shown by comparison with the high average of 4134 persons which was recorded for the annual loss from net migration over the five years 1924 to 1928. As a result of the consistent losses over that quinquennium the population of the State was lowered on an average by approximately 16 persons annually, but in the subsequent four years, when net migration changed to the comparatively favourable levels mentioned, a net increase was recorded to the population of 2572 yearly. In addition to the loss sustained by net migration, the population during 1933 was further lowered as compared with the previous year's by a very low natural increase, or excess of births over deaths, of 2361 (2469). The net increase for 1933 was, therefore 1402 (2143), as previously indicated. Particulars of natural increase and net migration are set out hereunder:—

Natural Increase (Excess of Births over Deaths).

	Males.	Females.	Total.
Births registered in 1933	2344	2209	4553
Deaths registered in 1933	1211	981	2192
Excess of Births	1133	1228	2361

Net Migration.

	Males.	Females.	Total.
Arrivals	18,294	18,950	37,244
Departures	18,601	19,502	38,103
Net Migration	— 307	— 552	— 859

BIRTHS.

The number of births registered during 1933 was 4553 (4491), and the corresponding rate per thousand of population 19·93 (19·78). The improvement in 1933 was only slight, and the birth rate remained very low in comparison with a decennial average of 22·77 births per thousand persons.

The birth rate for the urban area in 1933 rose to 16·7 (16·4) per thousand persons. The improvement was confined to Hobart and suburbs with a rate of 16·3 (15·8) births per thousand of population. Corresponding birth rates for the other urban districts were 16·0 (15·9) per thousand for Launceston and suburbs and 24·0 (24·0) for Devonport. For rural districts collectively, the birth rate was unchanged at 22·5 (22·5) per thousand of population.

The following table gives a comparison between the town and country rates over an extended period, and shows the decline of the birth rate which has been a general experience for many years past:—

Births per 1000 *of Population.*

	1933.	1932.	1923-32.	1911-20.
Urban districts	16·7	16·4	19·5	26·9 (*a*)
Rural districts	22·5	22·5	24·7	29·7 (*a*)
Tasmania	19·93	19·78	22·77	28·12

(*a*) Approximate.

DEATHS.

The death rate for 1933 was unusually high at 9·60 (8·90) per thousand of population. The actual number of deaths registered during 1933 was 1629 (1506), the highest since 1929, when there were 1712 deaths registered. The corresponding death rate in 1929 was 9·99 per thousand persons. The heavy mortality in 1933 compared very unfavourably with past experience, as shown by the decennial average of 9·42 per thousand persons.

The increased mortality in 1933 extended over both urban and country districts, being relatively more severe in the latter. In the urban division the main increase occurred in Launceston and suburbs, where the death rate rose to 10·0 (8·9) per thousand of population. The death rate was high also in Hobart and suburbs at 11·2 (10·6) per thousand persons, but a decided improvement was recorded in the death rate for Devonport, 10·3 (11·8) per thousand. For the whole urban division the death rate rose to 10·7 (10·1) per thousand of population. Rural districts in the aggregate showed the unfavourable rate of 8·7 (7·9) deaths per thousand persons. The increase in mortality in country districts was most marked in the South-Eastern, Southern, and Western Divisions, with death rates of 9·0 (7·7), 9·1 (7·5) and 9·1 (7·5) per thousand persons respectively.

The urban death rate is adversely affected by the inclusion of deaths in the New Town Infirmary and the Consumptive Sanatorium, which properly should be distributed over the State. The rate for the Southern Rural Division is similarly affected by the location of the Mental Diseases Hospital within that division. The figures in the following table represent the results after distributing the deaths in those institutions on a population basis:—

Deaths per 1000 *of Population.*

	1933	1932.	1923-32.
Urban districts	10·5	9·9	10·6
Rural districts	8·9	8·1	8·3
Tasmania	9·60	8·90	9·42

The incidence of various causes in these results is given below:—

Causes of Deaths.

The high rate of mortality experienced in 1933 was the result generally of increases over all classes of diseases. The increase to 496 in the number of deaths from diseases of the heart was particularly pronounced. Both that and the corresponding total of 365 for the previous year were high compared with an average of 316 deaths from heart diseases for the ten years previous to 1933. As indicated in the previous review, this increase was the result mainly of the more careful statements of cause of death obtained in general from medical practitioners. A serious feature of the increases during 1933 was the continued growth in cancer mortality, a record number of 250 (230) deaths being due to this cause, against a decennial average of 199. Following a comparatively favourable year in 1932, with only 7 deaths, influenza in 1933 was severe, and resulted in a total of 23 deaths. Increases in number were recorded also in deaths from diarrhœa and enteritis, 37 (21), and from accident or negligence, 112 (87). The only decrease of importance in mortality occurred in diabetes, with 35 (43) deaths, although there was a slight improvement experienced in tuberculosis. Deaths from tuberculosis numbered 127 in 1933, compared with 132 in 1932 and a decennial average of 139.

Infant Mortality.

Infant mortality was again very favourable in 1933. Although the number of infant deaths in 1933, 187 (185), was slightly higher than in the previous year, the actual rate per thousand births at 41·1 (41·2) was the lowest yet recorded in Tasmania. The marked improvement in infant mortality rates during the past two years is indicated by comparison with corresponding rates of 46·0 in 1931, 50·6 in 1930, and an average of 54·4 per thousand births over the five years previous to 1930.

The most marked improvement in infant mortality was recorded in Launceston and suburbs with the low rate of 41 (51) deaths under one year per thousand births. The corresponding rate for Hobart and suburbs also declined slightly to 50 (52) per thousand births, but owing to an abnormally heavy rate in Devonport, 63 (25) per thousand births, the urban area as a whole showed only a very slight improvement with a rate of 48 (49) per thousand births for deaths under one year. For rural districts collectively, the infant mortality rate was 37 (36) per thousand births. On account of the small numbers involved, many individual country districts showed marked fluctuations, the chief of which were a fall in the rate for the Midlands Division to 31 (65) and a rise to 44 (29) per thousand births in the West.

Of the 187 (185) deaths of children under one year during 1933, there were 126 under one month of age, corresponding approximately to deaths from pre-natal causes. Deaths in the subsequent eleven months are due commonly to causes of a preventable character. Compared with the previous year, there was little change during 1933 in mortality in these two groups, with death rates respectively of 27·7 (27·4) and 13·4 (13·8) per thousand births.

The following table gives a comparison of the number of deaths in each of the three chief groups of causes of deaths under one year.

	1933.	1932.	Average, 1923-32.
Diseases of the respiratory system	22	26	33
Diseases of stomach	9	9	25
Pre-natal causes	130	123	151

The difference between town and country with respect to "preventable" infant mortality may be inferred from the following table:—

Infant Deaths Over One Month of Age per 1000 *Births.*

	1933.	1932.	Average, 1928-32.
Urban districts	17	16	24
Rural districts	11	12	16
Tasmania	13·4	13·8	19·2

STILL-BIRTHS.

The number of still-births registered in 1933 was 123 or 2·6 per cent. of all births. In 1932 the corresponding number was 127 or 2·8 per cent., and in 1931 118 or 2·4 per cent. The total of still-births, together with deaths of children under one month, was equivalent to 55 (56) per thousand live births, which represents a high degree of mortality compared with the corresponding proportion of 13 (14) per thousand live births for deaths over one month and under twelve months of age, where the causes of death are mainly of a preventable nature.

INFECTIOUS DISEASES.

The total of 1320 (1108) for cases of infectious diseases notified during 1933 was unusually large. The main cause of the increased number was the prevalence of diphtheria, 706 cases of which were reported in 1933, against 455 in 1932 and 589 in 1931. There were in addition serious increases in the incidence of syphilis and typhoid fever, with 67 (27) and 37 (25) cases respectively. Compared with the previous year there were also more cases of tuberculosis 188 (168), and of puerperal fever, 14 (7). Scarlet fever, which had been severe in 1932 with 417 cases, declined in 1933 to 370 cases. The figures for the principal notifiable diseases are as follows:—

	1933.	1932.	1931.
Typhoid	37	25	22
Scarlet fever	370	417	265
Diphtheria	706	455	589
Tuberculosis	188	168	174
Syphilis	67	27	25
Puerperal fever	14	7	15

MARRIAGES.

A feature of the year 1933 was the considerable increase recorded in the number of marriages. The total marriages registered during 1933 numbered 1629, compared with 1506 in 1932, 1504 in 1931, and 1450 in 1930. The corresponding marriage rates per thousand of population were 7·13 for 1933 and 6·63, 6·69, and 6·56 respectively for the preceding years. The decennial average for the marriage rate is 6·95, and a very favourable indication is the fact that the marriage rate in 1933 was above its decennial average for the first time since 1928.

VITAL STATISTICS, AUSTRALASIA—GENERAL SUMMARY, 1933.

Deaths in Public Hospitals (excepting the Infirmary and the Consumptive Sanatorium which are in the Hobart District and the Mental Diseases Hospital at New Norfolk) have been referred to the District in which the case originated. Deaths at sea are not included.

NOTE.—In the revised classification of causes of death adopted in 1931, the new classes of diseases formed are only approximately the same as the old classes. In consequence the figures from 1931 onwards shown above are not strictly comparable with those for the previous years.

* Deaths which occurred at sea, or on foreign ships in Tasmanian waters, and were registered in Tasmania, are not included.

† Croup has been included with diphtheria since 1913.

§ Including cerebral apoplexy and arteriosclerosis in association with cerebro-vascular lesion.

‡ These results are the arithmetic means of the rates for each of the five years

Number of Minors married in 1933, 103 males, 453 females. For further particulars of age at marriage see Commonwealth Demography for 1933.

METEOROLOGY.

SYNOPSIS OF THE WEATHER OVER TASMANIA DURING THE YEAR 1933.

The rainfall for 1933 was under average over practically the whole of the State. Deficiencies ranged from about 10 to 20 per cent. of the average. A few stations near Longford in the north and Hobart in the south recorded a slight excess.

MONTHLY RAINFALL.

In no month this year were totals over the average over the whole of the State. In March, all but the Eastern and parts of the Midlands Divisions recorded a moderate excess. June, July, and August were months of deficient rainfall in practically all divisions. Totals for this period were the lowest on record in the Bothwell-Bagdad Districts, and the lowest for 25 or over 30 years at some stations in the Derwent Valley, Midlands, and around Launceston. July was the driest on record at one or two Derwent Valley stations and for over 35 years at a few places in the north. Northern districts also experienced a marked deficiency in February and to lesser degree in January. February was the driest for 19 years or more at most stations, totals ranging from nil to $\frac{1}{4}$-inch. December was also rather dry, particularly from the Midlands and Huon District to the West Coast, totals being the lowest for 35 years or more at a few Huon and western stations.

MEAN MONTHLY TEMPERATURES.

The outstanding meteorological feature of the year was the remarkably cool summer and autumn. The mean temperature for the first three months was the lowest on record at Hobart and since 1907 at Launceston. For the six months January to June means were the lowest since 1853 at Hobart and since 1907 at Launceston. February was the coldest on record at Hobart and since 1902 at some other stations. January was the coldest since 1924 and April since 1909 at several stations. Mean temperatures were also well below normal in August, which was the coldest in the north since 1908. The winter and spring months were, on the whole, mild, but cold periods with snow on the highlands followed by heavy frosts occurred in the last week of June, from the 16th-18th July, 31st July-4th August, and 23rd-25th August. Mean temperatures were about 1 degree above the average for October.

CROPS AND PASTURES.

The harvest of the 1932-33 crop was very satisfactory, the season being generally favourable for growth. Dry weather in the north in February and March caused some concern in agricultural districts, but this was relieved by good rains at the end of March and in April. Growth was retarded, however, by the cold weather which followed and by a further deficiency of moisture in May. Periods of fine weather enabled farmers to put a large acreage under cultivation. An absence of high winds was favourable for the conservation of moisture during the winter, and the light to moderate rains received were sufficient for requirements. Relatively mild temperatures also favoured some growth in crops and pastures. Some anxiety again arose in August owing to shortage of feed for stock and the checking of growth by frosts, but good rains and milder weather at the end of the month brought an improvement in the prospects. Further beneficial rains fell at intervals until early in October, and crops made good headway for a time. A period of deficient rainfall in October and November gave cereals another setback, but timely rains at the end of November again relieved the situation. Although periods of dry weather occurred in December, the outlook at the end of the year was, on the whole, satisfactory.

PRESSURE VARIATIONS AND PRINCIPAL METEOROLOGICAL FEATURES.

In *January*, mean pressure was about normal. Southern Ocean low pressure activity was rather pronounced from the 9th to 14th and 27th to 30th, causing rough westerly to southerly weather at times followed by periods of low temperatures. Some sharp frosts occurred on 16th and 31st and hail storms on the 30th. The lowest barometer reading at Hobart for the year (29·144) was recorded on the 10th. Monsoonal low pressure activity was rather marked over most of the Commonwealth at intervals, particularly from the 15th-25th. Pressure remained high over Tasmania with cool southerly to easterly winds in southern and eastern districts. Monsoonal Southern Ocean troughs brought some good rains with thunderstorms on the 4th and 25th-26th. Some heavy local downpours occurred on the 26th (Richmond 62 points in 10 minutes).

Mean pressure for *February* (·168″ below normal) was the lowest recorded since 1879 at Hobart. Barometers remained below the average after the 6th, falling at intervals below 29·5 inches as low pressure activity became pronounced over the South Tasman Sea and New Zealand. Anticyclones approaching from the westward died out before reaching this State. Rough south-westerly to southerly weather was experienced at times between the 14th and 25th. A heavy swell in the Derwent estuary, the result of southerly gales outside, from the 20th-22nd, caused some damage at Brown's River Beach and Blackman's Bay. The period 18th-24th was the coldest experienced in February for at least 40 years. Most of the month's rain occurred on the 19th, the best falls being in the south-east quarter.

Rather marked fluctuations in pressure and temperature occurred in *March*. Approaching anticyclones retained their intensity, but mean pressure was one-tenth inch below normal. The most marked developments of low pressure activity occurred on the 17th-19th and 22nd-23rd when rough north-westerly to westerly weather was experienced. The Hobart barometer fell ·65″ in 19 hours and rose ·825″ in 24 hours on the 22nd-23rd. A cold snap followed the disturbance of the 18th, and a record low minimum temperature for March was registered at Launceston on the 21st. Potato crops were damaged by frost in the north and north-west. The 9th-10th, on the other hand, was one of the warmest periods of the year.

The best rains of the autumn were recorded on 30th *March* and 6th-12th *April*. Heavy falls occurred in parts of the north-east on 6th April (Lottah 622 points, St. Marys 566 points), and flooding resulted in the rivers. These rains were due mainly to a combination of monsoonal and Southern Ocean low pressure activity, the latter becoming pronounced from 11th-14th April. This and subsequent slight depressions till the 22nd caused intervals of rough westerly to south-westerly weather. Frequent cold changes were a feature of this month. The 23rd was one of the coldest April days on record at Hobart. A very intense depression developed over the Tasman Sea and New Zealand at this time. Many severe frosts followed till the 26th. Rapid pressure changes were recorded on the 10th-11th (fall of ·874″ in 24 hours) and 18th (rise of ·534″ in 9½ hours). Anticyclones in the first and last weeks developed considerable intensity, and at Hobart the highest barometer reading in April since 1884 was recorded on the 24th (30·678″). This was also the highest reading for the year. Mean pressure was slightly above the average.

Southern Ocean depressions in *May* in most cases developed considerable intensity as they approached the south-eastern States. The best rains of the month occurred with such systems on the 1st-2nd, 13th-16th, and 26th-31st. Heavy falls on the West Coast on the 2nd resulted in record floods in some rivers between Waratah and Rosebery. Low pressure activity in the first week caused rough westerly to south-westerly weather. Heavy squalls also occurred with a disturbance on the 15th-16th, doing some damage in Southern Tasmania. At Hobart a velocity of 70 miles per hour was recorded in a squall on the 16th (a record for May). A rapid increase in pressure followed (·577″ in 12 hours). The low pressure period of the 24th-31st was also a cold period with many frosts. Barometers were high from the 7th-12th and 17th-24th, and mean pressure was about one-tenth inch above the average as it was also in June, July, and August.

Moderately high pressure prevailed during the greater part of *June*. Depressions at the beginning and towards the end of the month were of moderate intensity, but in other cases were very weak. Showers fell at intervals with a few registrations of ½-inch or so. A deep cyclonic depression developed off the New South Wales Coast on the 23rd-24th and moving southwards caused cold southerlies over Tasmania with snow on the highlands followed by a period of frosty weather. Temperatures were comparatively mild otherwise. The wind travel at Hobart was the lowest on record for this month.

Anticyclones in *July* and *August* were of somewhat greater intensity, but low pressure activity was again very weak in this region with one or two exceptions. Low pressure developments over the Tasman Sea and to the south of Tasmania, about the 16th July, 31st July-2nd August, and 22nd August, were followed by cold periods with southerly to westerly winds, snow on the highlands, and sharp frosts. Traffic on the West Coast road was interrupted by snow on the 2nd-3rd August. The heaviest fall of snow for many years was experienced in the north-west on the 23rd August extending practically to sea level. Rough coastal weather was experienced on each of these occasions. The 13th-19th August was another cold period in which many frosts occurred. Light to moderate rains fell at intervals during these two months in most of the agricultural districts, but in the Derwent Valley and Midlands registrations were very light to light.

The intensity of depressions and anticyclones was still more marked in *September*. Good rains fell on the 1st, 7th, and 16th-19th, particularly over northern districts where some registrations of over 2 inches in 24 hours resulted in flooding in the rivers on the 17th-18th. Temperature fluctuations were slight with a few sharp frosts. The month closed with a prolonged period of high pressure, barometers rising to 30·5 inches. Mean pressure, as a result, was again nearly one-tenth inch above the average. Mean barometric fluctuations occurred in *October*, due in the first and third weeks to a high rate of movement of pressure systems, and in the second and fourth weeks to the frequent development of "Secondaries." A very beneficial rain was recorded on the 5th as a cyclonic depression passed over the State. Some falls of over 2 inches in 24 hours

occurred in the south-east quarter (Springs 420 points), and flooding resulted in eastern and midlands rivers. The secondary developments caused showers, more particularly over the south-western half of the State, and strong north-westerly to westerly winds prevailed with rough coastal weather, particularly in the second week. Pressure systems were of moderate intensity, and mean pressure was about normal. Temperature fluctuations were very marked at times, some depressions, particularly from the 18th-24th, being accompanied by heat and strong northerly winds.

Mean pressure for *November* was about 0·2 above normal and the highest on record at Hobart. The wind travel at Hobart was the lowest since 1912. There was a marked absence of low pressure activity over the Southern Ocean, but monsoonal low pressure was active on the mainland, causing some widespread rains. Relatively high pressure over this State and to the westward caused a prevalence of cool southerly to easterly winds. Heavy easterly weather developed in Bass Strait at the end of the month. Tasmania received three fairly general rains. Those of the 9th and 18th were light in most districts, but on the 30th many falls of over an inch were received and most agricultural areas received a good soaking. Sharp frosts in the Derwent Valley on the 4th did some damage to fruit crops.

The Southern Ocean low pressure region showed little activity again in *December*, though squally westerly to south-westerly weather resulted from the development of secondary depressions between the 20th and 23rd. Monsoonal activity continued on the mainland until the 13th, culminating in the most severe disturbance of the month. A cyclonic depression formed over the south-east of New South Wales and moving southward caused a heavy southerly rain in parts of Southern Tasmania. Very rough southerly weather was experienced off the south-east coast of the continent, and was followed by fresh to strong south-westerlies over Tasmania with a cold snap. Slight depressions during the early part of the month and on the 28th-29th were accompanied by periods of warm weather, the 29th being the warmest day of the year in the south. Temperature fluctuations were rather marked during the latter half of the month. Anticyclones developed considerable intensity, and mean pressure was one-tenth inch above normal.

The following is a summary of the Hobart monthly temperature and rainfall:—

Month.	Mean Temperature.	Normal Temperature.	Rainfall (inches).	Normal Rainfall (inches).
January	58·8	62·0	2·18	1·85
February	58·2	62·4	1·50	1·48
March	58·2	59·4	2·11	1·75
April	52·7	55·2	2·22	1·92
May	50·5	50·6	1·71	1·87
June	47·5	46·9	1·39	2·23
July	46·8	45·8	1·16	2·18
August	46·6	48·0	0·99	1·84
September	52·3	51·0	1·65	2·09
October	56·2	54·0	4·30	2·31
November	56·1	57·1	2·04	2·46
December	60·2	60·2	1·93	2·01
Year	53·7	54·4	23·18	23·99

The highest maximum temperature was 89·7 degrees on 29th December, and the lowest minimum 33·2 degrees on 30th June. The highest maximum temperature on record is 105·2 degrees on 30th December, 1897, and the lowest minimum on record is 27·0 degrees on 18th July, 1866.

The rainfall during the year for the various districts, as reported by telegraph, is summarised in the following table:—

District.	Mean District Rainfall, 1933.	Average for previous Years.	Percentage Departure from Normal.
Northern	3093	3889	20 % below normal
West Coast	9236	9962	7 % below normal
Central Plateau	2695	3505	23 % below normal
Derwent Valley	1686	2119	20 % below normal
Midlands	1923	2191	12 % below normal
East Coast	2563	3171	19 % below normal
South East	2583	3043	15 % below normal
King Island	2967	3403	13 % below normal
Flinders Island	2358	2617	10 % below normal

TASMANIAN TRADE.

Twelve Months Ending, 30th June, 1934.

(Figures in parentheses are those for the corresponding period of 1932-33.)

The figures shown in the following tables represent the values of the trade of Tasmania as compiled from documents presented by the importers and exporters respectively.

Imports for the year 1933-34 were valued at £7,427,900 (£6,796,100), an increase of £631,800, or 9·3 per cent., on the figure for 1932-33. Interstate imports were responsible for £6,790,700 (£6,231,600), or 91·4 (91·7) per cent. of the total, while oversea imports accounted for £637,200 (£564,500), or 8·6 (8·3) per cent. of the total.

Exports for the year were valued at £7,509,800 (£6,685,700). An increase of £824,100, or 12·3 per cent. Direct oversea exports, at £2,383,300 (£1,790,400), increased by £592,900, or 33·1 per cent., and were equivalent to 31·7 (26·8) per cent. of the total.

Owing to the rate of foreign exchange operating throughout the year, it is necessary to moderate the values of either imports or exports before the figures are properly comparable. During the year the Australian rate of exchange on London remained at 25 per cent., and oversea imports, valued in sterling at £637,200, must, therefore, be increased to £796,500 to indicate a value in exchange against exports.

Compared with the average of the previous five years, the total trade declined by £903,700, or 5·7 per cent., imports falling by £500,800, or 6·3 per cent., and exports by £402,900, or 5·1 per cent.

THE TRADE POSITION.

The following table shows clearly the "visible balance of trade" for the last ten years:—

	Total Trade. £1000	Imports. £1000.	Exports. £1000.	Excess of Exports. £1000.	Excess of Imports. £1000.	Imports as a Percentage of Exports.
1924-25	17,656	8808	8848	40	....	99·5
1925-26	17,162	8451	8711	260	....	97·0
1926-27	18,843	9406	9437	31	....	99·7
1927-28	19,490	9529	9961	432	....	95·7
1928-29	18,998	9235	9763	528	....	94·6
1929-30	18,936	9848	9088	....	760	108·4
1930-31	14,328	7344 (*a*)	6984	....	360	105·2
1931-32	13,726	6683 (*a*)	7043	360	....	94·9
1932-33	13,623	6937 (*a*)	6686	....	251	103·8
1933-34	15,097	7587 (*a*)	7510	....	77	101·0

(*a*) Value calculated for the purpose of this table. The recorded values were: 1930-31, £7,230,000; 1931-32, £6,534,000; 1932-33, £6,796,000; 1933-34, £7,427,900.

In view of the many "invisible" factors involved in international exchanges, a precise statement of the "balance of payments" as at any particular time for any country is a matter of great difficulty, and the case of Tasmania in this regard is not less difficult than that of most other countries. In Tasmania a more than ordinary amount of the activity of the community is devoted to providing for mainland tourists, a service which has the same effect on the trade balance as an export of goods, though no entry appears in the trade statistics on its account. On the other hand, there are services such as shipping, banking, &c., which enter into the equation, but which cannot be valued with even a reasonable degree of accuracy.

The figures submitted, therefore, are those arising from the visible interchange of commodities to which definite values can be given.

Subject to these limitations, therefore, there was an excess of exports over imports for the years 1924-25 to 1928-29, the surplus in the latter year reaching the high figure of £528,000. In 1929-30, despite an export of £426,000 of gold in connection with the Australian exchange difficulty, the balance was in favour of imports, the excess amounting to £760,000. Similarly in 1930-31, with gold exports amounting to £120,000, imports were greater by £360,000 after adjusting the values of oversea imports, while for the year 1931-32 a favourable balance of £360,000 was recorded without the assistance of any accumulated gold in the State's exports. During the past two years the balance has again swung in favour of imports to the extent of £251,000 in 1932-33 and £77,000 in 1933-34.

The increased trade of the State was shared by all ports, with the exception of King Island and Strahan, where decreases were recorded. The value of trade at Hobart, including its sub-ports on the Huon River and elsewhere, which accounted for more than half of the total trade of Tasmania, increased from £6,773,900 in 1932-33 to £7,621,400 in 1933-34, representing a rise of £847,500, or 12·5 per cent. Trade at Launceston also increased by £568,600, or 13·6 per cent., from £4,174,800 to £4,743,400. Contributions to the total trade made by the various ports during the last two years, expressed as percentages, were as follows:—Hobart, 51 (50·2) per cent.; Launceston, 31·7 (30·9) per cent.; Burnie, 5·8 (6·4) per cent.; Devonport, 4·9 (5·2) per cent.; Strahan, 3·3 (3·9) per cent.; Stanley, 1·1 (1·1) per cent.; Ulverstone, 0·9 (0·9) per cent.; Smithton, 0·7 (0·6) per cent.; and King Island, 0·6 (0·7) per cent.

The figures shown in the following tables include goods transferred to the mainland ports for transhipment to oversea countries, and similarly interstate imports include goods from oversea countries received through the mainland States.

CHARACTER OF TRADE.

IMPORTS.

Recorded Values.

The principal classes of goods imported during the year were:—Food and drink (except alcoholic liquors), £1,473,000 (£1,486,000); metals, metal manufactures and machinery, £1,418,000 (£1,084,000); clothing and textiles, £1,351,000 (£1,367,000); stones and minerals, £580,000 (£515,000); tobacco, £375,000 (£365,000); animal substances, £309,000 (£169,000); drugs and chemicals, £288,000 (£290,000); oils, fats and waxes, £274,000 (£273,000); paper and stationery, £238,000 (£239,000); rubber and leather and manufactures thereof, £164,000 (£142,000); and alcoholic liquors, £160,000 (£162,000).

The items set out hereunder are mainly responsible for the variations in 1933-34 as compared with 1932-33.

Increases.—Motor-cars, complete, £134,400; wool, £127,900; ores, £38,000; machinery, £35,700; hardware, £31,100; other textiles, £27,400; tyres and tubes, £26,000; aluminium, £23,900; metals and metal manufactures, n.e.i., £23,800; arms, ammunition, and explosives, £23,000; chassis for motor-cars, £17,100; butter, £16,200; sheepskins, £14,300; seeds, £13,900; fresh fruits, £11,500; fruits and vegetables, n.e.i., £11,100; tobacco, £10,100; railway and tramway vehicles, £9800; samples, £9200; copper-wire, £8800; nuts, edible, £8700; timber, £8700; earthenware, china, glass, &c., £8400; asphalt, £8400; coal, £8300; coke, £8100; live animals, £8100; films, £7500; railway and tramway material, £7500; perfumery, £7300; meat and fish, £6300; paints and colours, £6300; floor coverings, £6100; other food and foodstuffs, £5900; yarns, £5800; structural iron and steel, £5800; and biscuits, £5500.

Decreases.—Sugar, £39,200; wheat, £26,400; hosiery, £11,800; boots and shoes, £10,800; bags and sacks, £10,700; piece goods, £8200; petrol, £6700; other apparel and attire, £5900; hats and caps, £4900; oats, £4200; and tinned plates, £3700.

The most notable movement in imports was in motor-cars, with an increase of £134,400. Eliminating the tourist traffic by deducting export figures, the importation of motor-cars increased by £77,700 during 1933-34.

In the following table the net expenditure on net imports in connection with the motor industry is shown:—

	1931-32.	1932-33.	1933-34.
Net imports of—	£	£	£
Complete cars	83,400	79,600	157,300
Motor-cycles, chassis, bodies, parts, &c.	59,800	114,600	141,600
Petrol	106,600	114,600	107,900
Tyres and tubes	66,600	67,700	93,800
Total	£316,400	£376,500	£500,600

Wool also figured prominently, with an increase of £127,900. Although the total quantity imported, viz., 3,842,800 lbs., was only slightly in excess of last year, the increased value was due to the general rise in wool prices.

The class showing the highest increase was Class XII., metals, metal manufactures, and machinery with a rise of £334,000, chiefly on account of larger imports of motor-cars, chassis, and other items allied to the motor trade, £160,000, machinery,

£35,700, hardware, £31,100, and other items to a lesser degree. Class VI., animal substances provided the net largest increase among the classes, mainly as the result of increased values of wool and sheepskins. A substantial rise was also recorded in Class XI., stones and minerals, the principal items being ores, coal, and coke.

EXPORTS.

The value of exports increased from £6,685,700 in 1932-33 to £7,509,800 in 1933-34, an increase of £824,100, or 12·3 per cent.

The principal variations are set out hereunder:—

Increases.—Wool, £493,200; fresh fruits, £136,600; zinc, £108,900; timber, £94,000; other food and foodstuffs, £85,200; furred skins, £83,900; ores, £57,600; motor-cars, £56,700; sheepskins, £36,100; wood manufactures, £31,700; jams and jellies, £16,800; limestone, £16,500; apparel and attire, £16,300; vehicles and metal manufactures, other, £11,200; live animals, £11,000; potatoes, £10,800; cement, £8800; machinery, £6900; hides and skins, other, £6900; calcium carbide, £6300; cheese, £6000; cadmium, £5200; and furniture, £4700.

Decreases.—Butter, £147,000; woollen and worsted manufactures, £106,900; peas, unprepared, £48,300; copper, £45,400; zinc residues, £42,300; gold and silver and bronze specie, £37,100; rubber and rubber manufactures, £20,800; tanning bark, £13,300; films, £12,100; barley, £9300; and tobacco, £6600.

Wool represents the largest single increase in export values in 1933-34. Following the substantial rise in price realised for the 1933 clip, the exports appreciated from £546,600 in 1932-33 to £1,039,800 in 1933-34, representing an increase of £493,200, or 90 per cent. The quantities exported during the two years were 11,484,800 lbs. in 1932-33 and 11,334,600 lbs. in 1933-34.

Fresh fruits followed next in order, with an increase of £136,600, due mainly to better prices. During the year shipments to oversea countries totalled 3,039,800 bushels, at an average f.o.b. price of 3s. per bushel, a total value of £452,900, compared with 3,079,400 bushels, at an average of 1s. 9d. per bushel, or £269,500, exported in 1932-33.

A notable increase occurred in zinc, with a rise of £108,900. Although the quantity exported fell from 55,200 tons in 1932-33 to 52,900 tons in 1933-34, the increased price advanced the returns from £902,900 to £1,011,800. Ores also increased by £57,600.

A further increase was recorded in the trade in timber, the shipments of sawn timber rising from 19,660,000 super. feet in 1932-33 to 26,534,000 super. feet in 1933-34, while increases were also general in the other classes of timber exported. The total value of the exports of timber increased by £94,000.

Food and foodstuffs, hides and skins (including furred skins), motor-cars, and wood manufactures also recorded large increases.

The value of butter shipped dropped from £317,700 in the previous year to £170,800. The reduced quantity exported, viz., 19,700 cwts., reflects the decline in production, and combined with depressed prices, returns declined by £147,000.

Owing to the reduced demand for woollen yarns and woollen manufactures on the mainland, the value of these exports decreased by £106,900.

Other reductions of note were made in peas, unprepared, £48,300; copper, £45,400; and zinc residues, £42,300.

Taking food and foodstuffs as a class, the exports increased from £2,494,700 in 1932-33 to £2,532,700 in 1933-34, a rise of £38,000. This class was responsible for 34 (37) per cent. of total exports for the year.

Mainly on account of the higher prices of wool, Class VI., animal substances, increased in value by £619,500, followed by Class XII., metals, metal manufactures, and machinery, £133,700, and Class XIV., timber and wood manufactures, £130,600.

The quantity of potatoes shipped was 68,800 tons, comparing favourably with 68,570 tons exported last year. At an average price of £5 5s. 6d. per ton the returns increased by £10,800 to £362,700, against £351,900 at an average of £5 2s. 7d. per ton in 1932-33.

H. J. EXLEY, Deputy-Statistician,
Commonwealth Bureau of Census and
Statistics, Tasmanian Branch.

Hobart, 30th April, 1935.

IMPORTS AND EXPORTS, YEARS 1911 TO 1933-34.

NOTE.—The figures for the years 1911 to 1921-22 represent Direct Oversea Trade only, because no records of Interstate Trade or Oversea Trade transhipped in Mainland Ports were made during those years.

YEAR.	IMPORTS.	EXPORTS.	BALANCE OF TRADE EXCESS OF EXPORTS.	TRADE PER HEAD OF MEAN POPULATION OF—

† NOTE.—The figures given for each port in the last three tables above do *not* take into account coastal movements of shipping. Ships are recorded as arrivals at the *first* Tasmanian port of call only, and as departures only at the last port of call in Tasmania. A vessel coming direct to Stanley from Melbourne, calling at Burnie, Ulverstone, Devonport, and Launceston, and leaving the latter port for Sydney, would be recorded only as an arrival at Stanley and a departure from Launceston. For total shipping (including coastwise) at each port see page 39.

AGRICULTURE AND LIVESTOCK.

REPORT FOR 1933-34.

CROPS in 1933-34.

The total area under crop in 1933-34 was 288,390 acres, an increase of 9270 acres or 3·3 per cent on the previous year, and 15,570 acres or 5·7 per cent. more than the decennial average. This increase was mainly due to the larger area sown to cereals and pulse, which increased by 14,300 acres, the chief rises being in peas, 10,200 acres, and wheat 3100 acres. Green forage increased by 7170 acres and root crops likewise by 1850 acres, while a decrease of 15,000 acres was recorded in hay. All other crops remained substantially the same as in 1932-33. In most cases the yields from grain crops compared favourably with those of last year, the exceptions being in peas and beans, which suffered severely from unfavourable climatic conditions. The decline in the barley yield was principally due to the smaller acreage. The returns from the root and hay crops were slightly below average, but fruit and hops showed increases.

WHEAT.

The area sown to wheat increased from 20,990 acres in 1932-33 to 24,100 in 1933-34, representing a gain of 3110 acres, or 14·8 per cent., and some 5000 acres more than the average of the past decade. The average yield of 23·3 bushels per acre was 2·6 bushels higher than last year, and the production amounted to 560,700 bushels, compared with 433,000 bushels last year, and 411,400 bushels, the average of the last ten seasons.

BARLEY.

The acreage sown to barley was 7840 acres, a decline of 750 acres on the previous year, but represented an increase of some 2000 acres on the average for the last decade. Production amounted to 172,200 bushels, of which total 161,800 bushels were English and 10,400 bushels were of the Cape variety. The average yield per acre was 21·9 bushels for the former and 23·9 bushels for the latter.

OATS AND HAY.

The acreage sown to both varieties of Oats was almost identical with that of last year, but the total area, which amounted to 31,200 acres, of which 11,200 acres were Whites and 20,000 acres Algerians, still showed a decrease of 7500 acres on the decennial average. The yield of 27·4 bushels per acre for both varieties was slightly in excess of that of the previous season, and the harvest of 854,200 bushels exceeded the 828,200 bushels reaped in 1932-33, but fell considerably below the average of the past decennium, viz., 1,044,200 bushels.

The area under hay was 77,600 acres, compared with 92,700 acres sown last year. The production at 109,400 tons represented a decrease of 31,700 tons on last year, and 16,400 tons on the average for the past ten seasons.

PEAS.

The acreage of peas increased from 28,100 in 1932-33 to 38,300 acres in 1933-34, Blues rising by 4900 acres and Greys by 5300 acres. The season was unfavourable to high yields, and the production, despite the increased acreage, only equalled last year's output of 621,000 bushels. This figure, however, represents an increase of 200,000 bushels on the decennial average.

POTATOES.

A distinct tendency to stability of the area under potatoes has been shown during recent years, and the 36,500 acres planted during 1933-34 is identical with the decennial average, and only 700 acres greater than that of last year. With an average yield of 2¼ tons to the acre, production totalled 81,300 tons, compared with 98,000 tons in 1932-33, and an average output of 96,000 tons over the past ten years.

HOPS.

The continuous decline in the area under hops from 1535 acres in 1924-25 to 801 acres in 1932-33 was arrested during 1933-34 when a gain of 72 acres was recorded. The production was 1,608,600 lbs., compared with 1,384,000 lbs. in 1932-33, and the average of 1,938,000 lbs. during the last decade.

APPLES.

The area under orchards was 33,680 acres, an increase of about 900 acres on the figure for 1932-33. Of this total apple trees in bearing accounted for 23,300 acres, or 69 per cent. of the total. The yield of 4,953,000 bushels exceeded the production of last year by 543,000 bushels, and was in excess of the decennial average by 1,323,000 bushels. The high yield of 212 bushels per acre has only been exceeded on one occasion, namely, in 1931-32, when the record average of 252 bushels was recorded.

Oversea consignments benefited from improved prices and favourable exchange conditions, and the total value of the crop at port of shipment was £875,100, compared with £615,000 realised for the previous year's shipments.

Particulars of production and values during the last five years are as follows:—

1933-34.	Production.	Value at Port of Shipment.
	Bushels.	£
Exports, overseas	2,991,000	518,900*(a)*
Exports, interstate	1,706,000	327,200
Used in factories and local consumption	256,000	29,000
Total	4,953,000	875,100
1932-33	4,410,000	615,000
1931-32	5,844,000	1,168,000
1930-31	3,800,000	950,000
1929-30	3,950,000	663,000

(a) Includes bounty paid in Tasmania, £70,231

LIVESTOCK (at 31st December, 1933.)

HORSES.

The increase in the number of horses was 30, bringing the total to 30,299, compared with 30,269 in 1932.

CATTLE.

Cattle increased by 11,449 to 262,256 during the year, and the total now depastured is the highest number ever recorded.

SHEEP.

The total of sheep decreased by 5500 on the figure for 1932. The number recorded in 1933 was 2,035,000, distributed as follows:—

Ewes	815,349	40 per cent.
Lambs	482,602	24 per cent.
Other sheep	737,101	36 per cent.
Total	2,035,052	100 per cent.

PIGS.

The number of pigs recorded in 1933 was 38,126, as against 41,391 in 1932, a drop of 3265.

VALUE OF RURAL PRODUCTION.

The net value of rural production in 1933-34 was £3,910,300, compared with £2,864,100 in 1932-33, a rise of £1,046,200, or 36·5 per cent. The value of agricultural production, which was responsible for 41·5 per cent. of the total, increased by £447,000, and pastoral production, mainly on account of the rise in wool prices, increased by £654,900. On the other hand decreases were shown in dairying (£43,000) and poultry and eggs (£13,450).

The net value of production at the farm during the last five years was as follows:—

1929-30	3,828,600
1930-31	3,077,400
1931-32	3,433,700
1932-33	2,864,100
1933-34	3,910,300

Details of these values are shown on pages 7 and 8.

NOTE.—The percentage in the last column is designed to give an approximate measure of the proportion of farming and pastoral land excluding Crown leases and licences, that is rented from the owner. Share farms are left out as being intermediate in their nature. The figure given is the percentage of rented land to the total made up of rented land, freehold occupation and Crown land in process of purchase on time payment.

(*a*) Number of female workers are not comparable, because in earlier years many engaged only in housework were improperly included. (*b*) A minus sign (—) indicates decrease.

WOOL PRODUCTION.

DECENNIAL Summary of the Value and Quantity of Wool, 1924-25 *to* 1933-34.

Year.	Wool Produced.				
	Clip.	Stripped from Skins.	Wool on Skins Exported (estimated).	Total Quantity of Wool Produced. (*a*)	Total Value of Wool Produced.
	lbs.	lbs.	lbs.	lbs.	£
1924–25	9,340,967	126,085	1,016,400	10,483,452	1,466,750
1925–26	11,483,104	75,000	1,005,896	12,564,000	1,177,875
1926–27	11,353,480	68,600	910,920	12,333,000	1,005,140
1927–28	12,267,552	—	1,005,448	13,273,000	1,219,290
1928–29	13,489,164	90,836	1,320,000	14,900,000	1,324,440
1929–30	13,722,000	—	1,278,000	15,000,000	743,750
1930–31	13,458,000	—	1,342,000	14,800,000	504,430
1931–32	13,247,000	—	1,453,000	14,700,000	632,100
1932–33	13,523,000	—	1,677,000	15,200,000	680,830
1933–34	12,782,000	—	1,418,000	14,200,000	1,316,460

(*a*) From 1925-26 the production of wool is based on the records of exports. In previous years the wool production is thought to be understated.

MANUFACTURING PRODUCTION: TASMANIA.

Report for 1933-34.

(Figures in parentheses are those for corresponding periods of 1932-33.)

For statistical purposes in Australia a factory is an establishment engaged in secondary production, which uses power or employs more than three persons. Certain industries, however, such as construction works (buildings, wharves, bridges, and roads), threshing and slaughtering have never been included in the Commonwealth schedule of manufacturing industries. In the year 1930-31, as the result of a resolution of the Conference of Statisticians, 1930, a new classification of industries was adopted; consequently care is needed when comparing class totals, as the groupings may not now be identically the same as in the years prior to 1930-31.

NUMBER OF FACTORIES.

Returns were collected during 1933-34 from 899 (910) factories. Although smaller than in the preceding year, this number is large in comparison with the reduced numbers generally experienced over the three previous years as a result of the financial depression. During those years the number of factories fluctuated from 845 in 1929-30 to 805 in 1930-31 and 891 in 1931-32. The general tendency towards increased numbers of factories shown recently is an indication of better conditions, but part at least of the large increase recorded since 1930-31 has been due to greater efforts made to secure returns from all industrial establishments. There were no important changes in individual classes of manufacturing during 1933-34, the most prominent being a fall in the number of joineries to 35 (41), and of bush sawmills to 195 (199), while six new butter, cheese, and milk factories were included during 1933-34, making a total of 41 (35) for that group. New industries were commenced in Tasmania during 1933-34 in connection with razor blades and with corrugated-paper products.

HANDS EMPLOYED.

The number of workers employed in factories on an average for the year 1933-34, 9782 (9233), showed a considerable increase on the number in the previous year, and was the greatest since 1929-30, when the average number of workers was 10,820. As a result of the depression, loss of employment followed in the next year, 1930-31, the number of employees falling abnormally to 8829, but in each of the subsequent years a gradual recovery was made, with the result that approximately one thousand more workers were employed in manufacturing industries during 1933-34 than in 1930-31. The increase in workers during 1933-34 was confined solely to males, there being 569 (148), or approximately 8 (2) per cent., more male workers than in the previous year. The number of female workers decreased in number during 1933-34 by 20, or 1 per cent., to 2066 (2086).

The number of workers employed in sawmilling and in jam, canning, and pickles has grown considerably during the past two years. The number of male workers in bush sawmills rose to 837 in 1933-34, compared with 718 in 1932-33 and 561 in 1931-32, while in the jam, canning, and pickle industry, both male and female workers have increased in number, the number of males being 313 in 1931-32, 378 in 1932-33, and 433 in 1933-34, with corresponding totals of 72, 100 and 119 respectively for females. Compared with the previous year, increased numbers of male workers were shown in the following industries:—Railway and tramway workshops, 384 (309); miscellaneous products (mainly sports requisites), 225 (157); bread, biscuit, and confectionery factories, 645 (599); motor and cycle works, 384 (332); and chaffcutting, 193 (162). Decreases in the number of male workers occurred in boot and shoe factories, 49 (66); and in brick and tile works, 80 (90). The only important increase recorded in the number of female workers during 1933-34 was in bread, biscuit, and confectionery factories, 322 (243), while decreased numbers of females were recorded chiefly in woollen mills, 859 (926); hosiery and knitting mills, 40 (61); and in tailoring and clothing, 81 (105).

The following table gives a classification of hands employed according to the size of the factory in which they work:—

PERCENTAGE OF WORKERS IN FACTORIES.

Classification of Factory.	Tasmania.					Australia.
	1913.	1920.	1931-32.	1932-33.	1933-34.	1932-33.
1- 20 workers	38	32	43	43	41	27
21- 50 workers	21	26	14	14	15	17
51-100 workers	10	23	6	8	8	13
101 and over	31	19	37	35	36	43
Totals	100	100	100	100	100	100

Factories having not more than 20 hands employed a smaller proportion of workers during 1933-34, the percentage of all workers dropping to 41 (43). The percentage of workers in the larger factories were correspondingly greater, the proportion in factories employing between 50 and 100 hands being 15 (14) per cent., and in factories with over 100 hands, 36 (35) per cent. In the latter class, the average number of hands per establishment during 1933-34, as in the previous year, was 308, which was much higher than the latest average available for the Commonwealth, 270 in 1932-33. The average number of workers for all factories in Tasmania during 1933-34 at 12·2 was slightly higher than in the previous year, 11·6, but small in comparison with the Commonwealth average of 17·2 for 1932-33.

OUTPUT AND PRODUCTION.

The consideration of the activities of various industries requires differentiation between "value of output" or the gross value of goods delivered from the factory, and "value of production," or "net production," which is the value added to raw materials used in the factory in the process of manufacture. To obtain the actual value of the wealth so produced by factory processes the costs of manufacture must be as far as possible deducted from the value of output. Such costs are the value of raw materials used; wrappers and containers, the cost of fuel, power, light, water, and other stores; tools replaced and repairs to plant; and depreciation. Wages, in relation to industry as a whole, are reckoned, not as a cost of manufacture, but as the share of the value of production accruing to labour from its co-operation with capital. At present, also, no deduction is made for depreciation owing to the impossibility of getting figures completely accurate and consistent.

The following table sets out the allotment of the gross value of output between these items for the last five years:—

	1929-30	1930-31.	1931-32.	1932-33.	1933-34.
	£	£	£	£	£
Output	8,560,452	6,115,567	6,423,177	6,563,083	6,786,409
Raw material	4,012,745	2,462,764	2,808,890	2,894,489	2,911,737
All other costs (excluding wages and depreciation)	985,482	845,306	805,904	789,157	824,821
Net production	3,562,225	2,807,497	2,808,383	2,879,437	3,049,851
Labour cost	2,154,053	1,645,108	1,522,931	1,524,947	1,584,385
Unallotted balance	1,408,172	1,162,389	1,285,452	1,354,490	1,465,466
Labour cost per cent. of net production	% 60·5	% 58·6	% 54·2	% 53·0	% 51·9
Net production per £100 labour cost	£ 165	£ 171	£ 184	£ 189	£ 192

The gross output for 1933-34 amounted to £6,786,000 (£6,563,000), and net production to £3,050,000 (£2,879,000). After deducting labour costs from net production, an "unallotted balance" of £1,466,000 (£1,354,000) remained for distribution among overhead charges and profits, together with an allowance for depreciation. Net production, which gives the best indication of the activities of the factories of the State, had for a number of years been valued at about £3,600,000, but with the onset of the business depression the value dropped in 1930-31 to approximately £2,800,000, and remained the same in the following year.

In 1932-33 net production was only slightly higher in value at £2,879,000, but rose considerably during the year under review to £3,050,000. When reckoned in relation to labour cost, however, net production has grown consistently since 1929-30. For each £100 expended in salaries and wages, the average value of net production was £192 in 1933-34, compared with £189 in 1932-33, £184 in 1931-32, and £171 in 1930-31. For the five years preceding 1930-31, net production averaged £171 per £100 labour cost. The aggregate cost of raw materials rose moderately during 1933-34, and amounted to £2,912,000 (£2,894,000), representing 43 (44) per cent. of the total output. The amount paid in salaries and wages during 1933-34 was £1,584,000, compared with £1,525,000 in 1932-33, and £1,523,000 in 1931-32.

The following figures show the trend during recent years of net production in the chief industries:—

Industry.	Net Production.					Net Production per £100 of Labour Cost.
	1929-30	1930-31.	1931-32.	1932-33.	1933-34.	1933-34.
	£	£	£	£	£	£
Lime, cement, &c.	73,859	73,445(*a*)	101,508(*a*)	132,430(*a*)	146,587(*a*)	339
Sawmills	255,122	118,101	126,773	155,805	183,471	134
Metal extraction	697,067	656,913	454,416(*c*)	493,670(*c*)	533,781	208
Biscuits, confectionery, &c.	189,085	154,883	170,489	183,837	191,914	139
Jam-pulp, &c.	165,626	95,576	152,693	162,612	137,405	142
Woollen mills	237,945	293,365	367,895	398,716	388,629	224
Books, printing, &c.	231,048	193,410	189,535	184,857	201,279	148
Cycle and motor works	118,207	79,591	76,831	74,226	79,733	139
Heat, light, and power (including carbide)	348,523	268,810(*b*)	338,681(*b*)	324,847(*b*)	357,066(*b*)	894

(*a*) Including carbide. (*b*) Excluding carbide. (*c*) Including engineering (not marine or electrical).

As may be seen from the table, net production during 1933-34 was greater than in the previous year in practically all the main classes of manufacturing. The most important increase occurred in metal extraction, where, as a result of resumed operations in tin mining and increased extraction of zinc and copper, net production for 1933-34 rose in value to £533,781, compared with £493,670 in 1932-33 and £454,416 in 1931-32. The rise in net production for this class during the year under review was actually greater than shown above as the two previous years' figures were increased by the inclusion of net production in engineering other than marine or electrical (valued at £46,436 in 1933-34). The chief other increases recorded in net production during 1933-34 were in heat, light, and power, £357,066 (£324,847); sawmilling, £183,471 (£155,805); printing and binding, £201,279 (£184,857); and lime, cement, &c., £146,857 (£132,430). The value of production fell considerably in jam, canning, and pickles to £137,405 (£162,612), and to a smaller extent in woollen mills to £388,629 (£398,716).

COST OF MANUFACTURE.

Raw materials were greater in cost in substantially the same classes noted above with increased net production, viz., metal extraction, £863,297, excluding engineering, other than marine or electrical (£324,221); bark mills, £34,268 (£19,407); and sawmills, £141,800 (£111,989). The marked fluctuation in metal extraction costs was due mainly to the increased operations referred to above by the respective metallurgical companies. Of the remaining industries, decreases occurred principally in butter, cheese, and milk, £237,463 (£327,519); jam, canning, and pickles, £238,477 (£304,882); and tailoring and slop clothing, £46,552 (£54,036). Other items in the cost of manufacture, excluding raw materials, wages, and depreciation, rose rather considerably in the aggregate to £824,821 (£789,157).

LABOUR COSTS.

Although the total for wages and salaries for the year 1933-34 at £1,584,385 was slightly higher than in the preceding year, the average payment per worker fell slightly. For all workers, including working proprietors, the average amount paid in salaries and wages in 1933-34 was £183 (£190) for males, and £82 (£83) for females. Omitting working proprietors, managers, overseers, accountants, and clerks, however, the average wage received rose to £178 (£171) for males, and £76 (£74) for females.

The average payment for the year for all workers, both male and female, fell to £162, compared with £165 in 1932-33 and £169 in 1931-32.

FIXED CAPITAL.

At the end of 1933-34 the value of fixed capital investments stood at £8,753,000, approximately the same as at the end of the previous year (£8,661,000). Of this fixed capital, £2,631,000 (£2,629,000) was represented by land and buildings, and £6,122,000 (£6,032,000) by plant and machinery. Changes in fixed capital employed in individual industries during 1933-34 were small, the most prominent being an increase in the value of plant and machinery in industrial metals, machines, &c., to £1,235,751 (£1,092,100), which was offset to some extent by a decline in plant and machinery for the treatment of non-metalliferous mine and quarry products, £224,403 (£265,320).

POWER USED.

The aggregate horsepower used in all industries in Tasmania during 1933-34 was 146,691 (143,236). A deduction must be made from this total owing to the duplication of 60,498 horsepower due to the inclusion of electric power generated by other forces. The net horse power used was, therefore, 86,193 (86,347).

TAXATION COLLECTED BY COMMONWEALTH IN TASMANIA, 1928-29 TO 1933-34.

TAX.	1928–29.	1929–30.	1930–31.	1931–32.	1932–33.	1933–34.
	£	£	£	£	£	£
Income Tax (*a*)	121,969	136,818	189,588	205,717	131,905	107,768
Land Tax (*a*)	36,379	37,254	33,111	22,586	15,174	11,644
Estate Duty	17,275	9432	16,465	14,164	15,182	40,117
War Time Profits Tax	— 320	—1099	...	...	...	...
Entertainment Tax	3304	4093	1810	1026	990	332
Sales Tax (*b*)	...	...	71,804	165,052	169,996	(*f*)175,287
Customs (*b*)	312,858	359,989	173,013	223,487	248,458	248,955
Excise (*b*)	113,760	127,086	119,809	109,595	106,348	111,275
Total	605,225	673,573	605,600	741,627	688,053	695,378
Customs and Excise (*c*)	1,146,000	1,167,000	795,000	803,000	934,000	967,000
Sales Tax (*d*)	...	...	98,000	238,000	265,000	281,000
Estimated Grand Total (*e*)	1,324,607	1,353,498	1,133,974	1,284,493	1,362,251	1,407,861

(*a*) Collections at the Central Office (which for the whole of the Commonwealth amount to approximately one-third of the total) are not included.

(*b*) Actual collections in Tasmania. The amount of duty collected in the other States of the Commonwealth on goods transhipped to Tasmania is not included.

(*c*) Figures based on the assumption that the Customs and Excise Revenue per head in Tasmania, from 1913 onwards, bore the same proportion to the Customs and Excise Revenue per head for the Commonwealth that it did on the average for the nine years 1901 to 1909, for which years only full information is available (The average per head, 1901 to 1909, in Tasmania was approximately 82% of the average per head for the Commonwealth.)

(*d*) Assuming similar proportion of Collections per capita as for Customs and Excise.

(*e*) Excluding Central Office Collections of Income, &c., Taxes.

(*f*) Including Flour Tax.

CONSOLIDATED REVENUE, 1928-29 TO 1933-34.

(*a*) Including Special Grant (Commonwealth) and Expenditure therefrom.

ACCUMULATED DEFICIENCY TO 30TH JUNE, 1934.

The figures in the above table do not provide a complete record of the Accumulated Deficiency in the State's finances, owing to the practice of debiting Suspense Accounts with Revenue Charges. The following additional amounts should be added to the deficiency shown above to arrive at the aggregate position:—

Accumulated Deficiency at 30th June, 1934.

	£
Deficit, as shown in above table	1,345,679
Losses on Returned Soldier Settlement	719,763
Loss on realisation of State Ships	61,774
Losses on Marrawah Tram	83,134
Hydro-Electric Depreciation Deficiency	47,211
Railway Renewals Deficiency	69,374
Other	145,660
Total	2,472,595

NOTE.—The above sum excludes suspended sinking funds and the non-provision of depreciation for replacement of certain capital assets of the State.

GOVERNMENT EXPENDITURE ON PUBLIC WORKS, 1933-34.

(*a*) Including periodic payments in reduction of principal.
(*b*) Much of the debt of Local Government Bodies is in the form of Instalment Debentures, which means a fixed periodic payment on account of interest and principal. For each debt, therefore, the payment on account of interest decreases and the payments on account of principal increases from year to year. These figures indicate the liability as at 30/6/34.
(*c*) In addition loans amounting to £13,544 were transferred to Hydro-Electric Commission.

FRIENDLY SOCIETIES.

REPORT OF THE STATISTICIAN FOR THE YEAR 1933.

Hobart, 4th October, 1934.

SIR,

In accordance with Section 10 of the Friendly Societies Act, 1888, I have the honour to make the following report with respect to the year 1933.

(Note.—Figures in parentheses refer to the previous year—1932.)

Returns and Information.

District secretaries and secretaries of the larger lodges, together with all other persons who applied for them, were supplied with copies of the printed report and tables for 1932, showing the strength, progress, and financial position of the societies.

The returns relating to the year 1933 were examined as customary for compliance or otherwise with the Friendly Societies Act and the registered rules of each society. The result was pleasing, inasmuch as fewer irregularities were disclosed than formerly in the conduct of financial transactions. A conspicuous feature of past years has been the incorrect allocation of members' contributions between the various funds, but in 1933 offences in this respect were comparatively few in number, and generally of a minor character. Considerable improvement is desirable, however, with regard to the allocation of interest received from investments. Although specific instructions are issued to secretaries each year stressing the need for correct apportionment of interest earnings between funds, the treatment of interest received in 1933 formed the most unsatisfactory feature of the returns. In numerous instances the apportionments resulted in an excessive proportion of interest in the management funds, and it was accordingly necessary to require the secretaries responsible to make an appropriate transfer to their benefit funds. The tendency for secretaries to offend in this direction is aggravated by the fact that the discrepancies are not always apparent on the face of the return, so that they are the more likely to pass without correction.

The inconsistencies referred to above, as well as many others, should have been discovered in the course of the annual audit, which is compulsory under the Act. The fact that these offences invariably involve a shortage in the funds available for benefit purposes, and that they are regularly passed each year as correct by the auditors, should make apparent the urgency for improvement in the system of auditing. In some societies the annual audit of lodge accounts is performed or supervised by the district secretary, with satisfactory results, but mostly the branches are responsible for their own audit. Experience has proved that the local auditors appointed in these cases are generally not qualified for the work, and their audit consequently is of no value. The need for managements to give greater attention to this unsatisfactory feature has been repeatedly stressed, but as yet the societies affected have taken little action to provide the necessary safeguard for their funds.

Effects of the Depression.

The progress of the friendly societies movement was seriously checked by the financial depression. The societies have not yet shown any definite signs of improvement, and it may be desirable, therefore, to refer to the main features of the past few years. The depressed conditions and prevailing unemployment are reflected in the falling membership of the societies. The benefit membership which had grown to 27,160 by 1929 was practically stationary at 27,155 during 1930, but by the end of 1933 had decreased steadily to 24,661, a total net loss of approximately 2500 members over the past three years. As the incidence of unemployment has been generally more severe in the younger ages, the effect has been unfortunate in not only reducing initiations of the desirable age, but also in obliging many young members to forfeit membership on account of arrears of contributions. Most societies attempted to meet the situation, to some degree, by providing assistance for unemployed members which would entitle them to retain their claims. In some societies the assistance was made possible by voluntary contributions, while others used distress or benevolent funds where available, or, alternatively, made the unemployed members' contributions for benefits a charge against the management fund. Care was taken to see that the sick and funeral funds were not utilised in any manner in providing the various forms of donations and loans to distressed members.

The depression marked an exceptional increase in the sickness experienced in friendly societies. Details of sickness over the past five years are given below:—

Year.	Cases of Sickness.	Total Duration.	Average Length of Sickness.	Sick Payments.	Sick Pay per Financial Member.
	No.	Days.	Days.	£	£ s. d.
1929	5206	301,168	57·9	33,192	1 5 8
1930	4769	310,299	65·1	34,243	1 6 10
1931	5589	346,867	62·1	34,596	1 8 7
1932	5294	358,600	67·7	34,103	1 9 2
1933	5372	361,341	67·3	33,658	1 9 4

The most significant features of the sickness have been the increased average length of each case and the higher average payment per financial member. The average duration of sickness was 57·9 days in 1929, with sick pay £1 5s. 8d. per financial member, but by 1933 the average length of sickness was 67·3 days, and the sick pay disbursed per member £1 9s. 4d. Although the increasing liability on account of sickness may be due largely to the growth in the average age of members, the tendency has been so marked as to suggest other causes, which would include, probably, an inclination for members to prolong their sick claims on account of reduced earning capacity during the depression.

Friendly societies were affected also by the recent legislation requiring reduction in the rates of interest payable on certain investments. Interest earnings form an important contribution to the net income of the societies, and the loss from this source is serious, since it will probably continue for some years.

The combined effect of increased sick payments and reduced interest receipts, together with extra expenditure on special accounts, such as assistance to members, has tended to reduce profits considerably during the depression years. At the end of 1929 accumulated funds (exclusive of dispensary stock) were valued at £405,063. The increase in funds during the following year was nearly £17,000, or over 4 per cent. The profits in subsequent years were very small in comparison, averaging under 2 per cent. per annum. At the end of 1933 accumulated funds amounted to £443,281, the growth during the year being approximately 1·6 per cent.

It may be pointed out that the fall in value of real estate during the depression is of direct concern to societies Of the total funds, nearly one-half is represented by loans on mortgage or investments in halls. The consequence is that the securities forming this section of the capital funds of societies are of much lower value at present, and there is, further, the likelihood of increased arrears of interest due on the mortgages. The position in Tasmania is, however, more favourable than in the mainland States, where, as a general rule, a greater proportion of funds has been invested in mortgages, halls, etc.

Societies.

The number of distinct friendly societies in Tasmania at the close of 1933 was 19 (19), exclusive of two dispensaries. Of these, 13 (13) were ordinary friendly societies. The other 6 (6) societies were of a special nature, with no branches, and membership restricted to the staff of a particular firm or institution or to the residents of a certain locality. The membership of this "various" group, numbering 2024 (2178), formed 8·2 (8·6) per cent. of the total membership. The number of branches attached to ordinary societies has varied little in recent years, and at the end of 1933 was 184 (185), of which 152 (152) were for male members, with provision in some cases for females, 21 (22) exclusively for females, and 11 (11) for juveniles.

Membership.

As may be expected in view of the unfavourable circumstances of the year 1933, the membership continued to decrease in number. The total membership by the end of 1933 fell to 24,661 (25,352), which comprised 22,462 (23,121) in adult male lodges, 1665 (1697) in adult female lodges, and 534 (534) juveniles. The net loss in 1933 is seen therefore to consist entirely of adult members, amounting for all societies to 691 (790), and for general societies to 537 (701). Membership in special societies is mostly conditional on the continuance of employment for members in the particular firm to which the society is attached, and consequently fluctuates in accordance with the employment available. In ordinary societies, however, the loss for the year 1933 was occasioned by an increased number of secessions on account of arrears of contributions. The total number of departures from ordinary societies through arrears and similar causes numbered 1351 in 1933. Of these, 1140 were males and 211 females, equivalent to 60·6 (59·1) and 134·7 (127·5) per thousand financial members respectively. The increase accorded with the experience of the past three years, during which the depression and the accompanying unem-

ployment brought secessions on this account to very high levels. In 1929 male departures through arrears of contributions numbered 41·9 per thousand financial members, but this rate was increased successively to 46·9 in 1930, 58·0 in 1931, and 59·1 in 1932, culminating in the record rate of 60·6 for 1933. In female lodges the same tendency has been evident. The number of departures from arrears of contributions in female lodges was 92·3 per thousand financial members in 1929, but rose to 124·2 in the following year. Although secessions from the same cause dropped to 109·5 per thousand financial members in 1931, they have since risen abnormally to 127·5 in 1932 and 134·7 in 1933.

A favourable indication for the future was the greater number of initiations in ordinary societies during 1933. These numbered 825 (771) in male lodges and 199 (162) in female lodges, or 43·8 (40·3) and 127·1 (105·9) respectively per thousand financial members.

Of the total members, there were 1741 (1982), or 7·1 (7·8) per cent., unfinancial at the end of the year. Although the year 1933 shows a slight improvement on the two previous years in this respect, the percentage unfinancial in 1931 being 7·3, the proportion of unfinancial members has increased greatly since 1930, when the corresponding percentage was 6·0.

The increase in the average age of members during 1933 was not so pronounced as formerly. For members of male ordinary lodges, the average age in 1933 was 42·5 years, compared with 42·4 in 1932, 41·6 in 1931, and 40·5 in 1930. The average age of 37·0 years in 1920 shows, by comparison, the serious growth in the ages of members during recent years. Attention has been directed previously to this tendency in friendly societies, and it has been pointed out that societies are subject on this account to increasing liability for sickness and mortality claims. Past reports may be referred to for details of the changes in the distribution of members over the main age-groups since 1920. It may be noted that the continued growth in the average age of members in recent years has been caused principally by the shortage of new members at young ages.

For females the position is very similar. The average age of female members in 1933 rose to 31·8 years, which showed only a slight increase from the average of 31·7 in 1932, but compared unfavourably with the average ages of 30·9 years in 1931 and 30·2 years in 1930.

Sickness and Mortality.

The sickness experienced in friendly societies during 1933 showed a slight improvement, but was still very heavy. In male lodges there were more cases of sickness, totalling 5041 (4994), but the total duration of sickness fell to 338,979 days, compared with 339,610 days in 1932. The average length of sickness in 1933 fell therefore to 67·2 (68·0) days. In female lodges, however, there was a serious increase in sickness, both in respect of the number of members claiming sick pay and of the average length of each case. The number of cases rose to 331 (300) during 1933, with a total duration of 22,362 (18,990) days. The average period for which sick pay was drawn in female lodges was therefore much longer in 1933, extending to 67·6 days, compared with 63·3 in 1932, and 55·0 in 1931.

During 1933 there were 265 (269) male deaths in friendly societies and 10 (6) females, making a total of 275 (275). The rate of mortality per thousand financial members was 12·7 (12·6) for males and 6·4 (3·9) for females. There were more deaths of registered wives than in 1932, with a total of 132 (120), the funeral payments relating thereto amounting to £1872 (£1623).

Funds.

The year 1933 showed an improvement in the financial position of friendly societies in Tasmania from the previous year, which, with the low surplus of £4894, was the worst experienced for some time past. In 1933 net revenue was greater at £118,117 (£116,391), while expenditure was reduced on all main items, the net sum expended being £110,890 (£111,497). As a result the surplus for 1933 rose to £7227, representing 6·5 (4·4) per cent. of net expenditure, which was above the average of 6·3 per cent. for the surplus in the years 1931-1933. Over the period 1926-30, however, the yearly surplus had amounted to approximately 15·3 per cent. of net expenditure, so that the growth in funds during the past few years has been abnormally small.

Exclusive of dispensary stock, valued at £4348 (£4184), accumulated funds by the end of 1933 amounted to £443,281 (£436,218), increasing by nearly 2 per cent. during the year. The capital per financial member was therefore £19 6s. 9d. (£18 13s. 4d.).

Receipts.

Net revenue for 1933 was £118,117, or £1726 more than in the previous year. Despite the heavy decrease in membership during 1933, receipts from members' contributions and levies were higher, amounting to £85,969 (£84,750), or £3 15s. 0d. (£3 12s. 6d.) per financial member. Receipts from other sources also increased, the principal being entrance and registration of wives fees, £301 (£292), interest on investments, £18,511 (£18,393), or 16s. 2d. (15s. 9d.) per financial member, and miscellaneous items, £13,336 (£12,956), or 11s. 8d. (11s. 1d.) per financial member.

The return from investments for 1933 formed 4·2 (4·3) per cent. of all funds. In 1931 the average rate of interest was 5·1 per cent., but owing to the legal enactments reducing rates of interest in 1932, the income from this source has fallen materially, and will probably remain at a low level for some years.

Expenditure.

Of the net expenditure of £110,890 (£111,497), the greater part was distributed in payment of benefits for members, which totalled £82,893 (£84,587). These comprised £33,658 (£34,103) sick pay, £27,582 (£28,316) medical expenses, and £21,653 (£22,168) funeral donations. The average disbursements per financial member under these headings were 29s. 4d. (29s. 2d.), 24s. 1d. (24s. 3d.), and 18s. 11d. (19s.) respectively. Of the remaining expenditure, £17,986 (£18,477) represented cost of administration, and £10,011 (£8433) miscellaneous payments. The cost of administration per financial member during 1933 amounted to 15s. 8d., compared with 15s. 10d. in the preceding year.

The percentage distribution of net expenditure among the various items was as follows:—Medical attendance and medicine, 25 (25) per cent.; sick pay, 30 (31); funeral donations, 20 (20); administration, 16 (17); miscellaneous, 9 (7).

Conclusion.

In previous reports attention has been directed to the provision of the Friendly Societies Act requiring a quinquennial actuarial valuation of friendly society funds. The last valuation was made in 1921, so that a period of 13 years has already elapsed without a general valuation having been made.

The importance of the friendly societies to the community cannot be over-estimated when it is realised that they embrace one-third of the male bread-winners in the State, and form a powerful instrument for mutual help and thrift.

In the interests of the members of these societies, it is very desirable that an actuarial valuation should be made as early as possible, and I accordingly strongly recommend that the Government, following long-established precedent, should provide for another general actuarial investigation of friendly society funds.

The Friendly Societies Act was passed in 1888. Many improvements in friendly society practice have been made during the 46 years since the Act was passed. It is highly desirable that the present legislation in Tasmania be amended to bring it into accord with modern friendly society practice.

H. J. EXLEY,
Government Statistician and Deputy-Commonwealth Statistician.

The Hon. the Attorney-General,
Hobart.

NOTE.—In years 1915 and 1916 the receipts include moneys which were found to be Trust Funds which should have appeared as transfers. The capital shows these funds (some £6000 in 1915 and £3725 in 1916) in duplicate, in addition to details shown in these two years respectively.

* Deducting cross entries, £1190 in 1905, £388 in 1906, £505 in 1907, £706 in 1908, £391 in 1909, £430 in 1910, £1334 in 1911, £706 in 1912, £1899 in 1913, and £1192 in 1914. In 1915 and onward for cross entries, see annual detail.

† Juvenile Lodges not included.

§ Capital of Lodges closed during year 1914, £45.

‖ Excluding value of Dispensary Stock on hand in 1913, £685; in 1914, £1588; in 1915, £1491; in 1916, £1744; in 1917, £1981; in 1918, £2403; in 1919, £2871; in 1920, £3060; in 1921, £3558; in 1922, £2986; in 1923, £3262; in 1924, £3526; in 1925, £3556; in 1926, £3750; in 1927, £3843; in 1928, £4287; in 1929, £4184; in 1930, £4529; in 1931, £4355; in 1932, £4184; in 1933, £4348.

‡ In 1920 and onward "Consolidated Sick Funds" and "Juvenile Funeral Funds," &c., which appear in earlier years in "Other Funds," are included in this column.
